

Dear Parents,

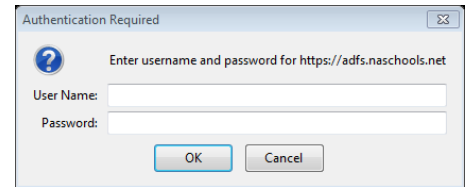

The first week of classes is now behind us. We have finished setting up the basics in class and administered a unit pretest as well.

I have sent your children a homework assignment through their naschools.net email address. The students can access it through the school website. The school department has a link on the main website (www.naschools.net) to MS Office 365. The email contains a link to a video on the Universal Systems Model and an attachment.

Student enter their school email address in full here. Their email address is a combination of their school username with @naschools.net attached. (ex. Jdoe@naschools.net) Then press enter on the key board. It will bring the student to a 2nd screen.

The 2nd screen requires their typical school username and password. (ex. Jdoe) along with their password.

Once the student has logged onto O365, they should access their email and use the link to watch a short video and complete the handout attached.

As always, if you have any questions, do not hesitate to contact me.
