PREPARE TO SUCCEED

NEW TECHNOLOGY LAB & COMPUTER SCIENCE LAB AT THE HOCKOMOCK AREA YMCA

Calling all youth and teenage critical thinkers and designers!
Are you interested in coding, computer science, technology trends, and eager to learn more? Maybe even potentially build a career in a technology field? Computer science is the fastest growing field. Don't miss this free opportunity to dive in.

Starting Tuesday, September 11th from 7:00pm - 9:00pm
at the Bernon Family Branch Technology Lab
Second floor next to the walking track

JOIN OUR FIRST CLUB: PYTHON CODING

Did you know Python programming skill is one of the most sought after scripting languages available today? Many of the internet's most popular services run on Python: Google, Facebook, Instagram, Spotify, Quora, Netflix, Dropbox, Reddit and more! Students will focus on learning to program in Python on the Windows PCs provided in the YMCA lab. As part of the class they will have hands-on instruction on the programming process from application design, coding, compiling and loading the final application on the devices available. Any adults wanting to learn and make a career change are welcome to join as well.

Upcoming meeting dates:

10/23, 11/13, 12/18, 1/22, 2/12, 3/19, 4/23, 5/21 & 6/18 from 7:00pm-9:00pm.

Free meetings but space is limited. Please register by calling the Franklin YMCA at 508-528-8708 or members can register online at hockymca.org/new-technology-club
