

ROBOTIC SYSTEMS

Interested in Robotics and how things work? Join us this Summer for Robotic Systems and construct a remote controlled robotic arm. This is an advanced robotics course and students should have some experience with robotics prior to this class. Students will build, operate and keep a robotic arm. Students will see demonstrations of robots working arms.

Robotic Systems will meet the week of August 19th through August 23rd. Class is held from 10:30 AM to 12:00 PM upstairs at the Mason Fieldhouse. The cost for the class which includes a robotic arm is \$150 per student. All tools needed will be supplied. This program is recommended for children 10 and up.

Make sure to create an account on www.narecreation.com to stay informed and register online (all participants must have an account even to register in office).
